HSE ENGINEER

You take care of the day-to-day running of the factory in Tallinn, including, for example:

- ↳ develop HSE process and procedures and supervise their implementation within the workplace;
- ↳ conduct safety induction and other safety trainings to employees, management and contractors;
- ↳ conduct, review job hazard analysis and risk assessments of high-risk work like lifting, confined space work and etc;
- ↳ investigate and report incidents, accidents and near misses;
- ↳ complete administrative duties, filling out internal safety reports, reports to Client and parent company;
- ↳ coordination with Client respective department to understand project specific HSE requirements.

We expect from you:

- ↳ higher education (preferably technical, for example - degree in Industrial Engineering, Electrical Engineering);
- ↳ at least 3 years of professional experience in production or construction industry on a similar position;
- ↳ fluent in English and Russian (main working languages), good in Estonian language;
- ↳ decision making, organisational skills and stress resistance, good communication and interaction skills;
- ↳ understanding of relevant standards (ISO 9001, ISO 14001, ISO 45001), knowledge of NORSOK will be an advantage.

We offer:

- ↳ Responsible, versatile and new job in our company and opportunity to develop your skills and career in a truly international work environment.
- ↳ Safety and environment are our top priority and on this position you have the opportunity to make an impact..
- ↳ Working time: Monday to Friday 8:00-17:00;
- ↳ Location: Kopli 103, Tallinn
